Zero Spam | 2X Resources | No Tickets

Up to  
**50%**

Reduction  
In your  
server's  
Resource  
Usage!

Designed For

## Hosting Providers

### Remove Resource Intensive Software

With Raptor enabled, you can now disable SpamAssassin & ClamAV which will greatly reduce your server's resource usage.

### Avoid DDoS & Other Cyber Attacks

With your email pointed to our servers, we will take on most cyber attacks, NOT your server.

### Increase Your Hosting Revenue

With less resource usage, you can now monetize your server to a greater level by adding more hosting accounts.

## Never Experience Email Downtime Again!

### 30-Day Archive of All Email

Every time an email comes through our Raptor servers on its way to your mail server, we keep a copy for 30 days.

### Send & Receive Email When Your Server is Down

In the event your mail server goes down, all users will be able to send and receive email through our Raptor mail web interface.

### Automatic Sync After Downtime

When your mail server comes back online after being down, your queued email will be delivered directly to your email server automatically.

## Raptor Continuity

Included with  
All Plans
